

Learn your first five notes

Free. Pick your instrument. Name the note, find the fingering, then play along with the pitch the app holds for you. It listens and tells you whether you got the note on the page.

ON A COMPUTER OR CHROMEBOOK

ON AN IPHONE OR IPAD

Get the free app

Search the App Store for First 5 Notes.

virtunity.io/first-five-notes

1. Name it

See the note on the staff and say what it is.

2. Finger it, then play it

Set the keys or valves. Get it right and the app holds that pitch. Put your horn up and match it.

3. Check it

Play into the microphone. The app tells you if you got the note on the page.

Practice somewhere quiet. The app needs to hear your instrument, so a quiet room helps. Start slow. Accuracy and a beautiful sound come first, and speed comes with repetitions over time.
